Drizzle	Light rain showers	Thundery showers	Thundery showers	Heavy rain showers	Partly cloudy (night)
Precipitation probability					
70%	40%	50%	40%	30%	20%

Forecast for Sunday 26 May 2024

Weather: Drizzle easing soon after dawn to leave some drier spells to begin the morning. Broken cloud and sunny intervals with heavy showers developing. These may contain hail with a few thunderstorms possible, especially around the middle of the day. Fewer showers to end the day with some longer periods of sunshine.

Chance of cloud-free hill tops above 600m: 30% increasing to 70% by late morning.

Low cloud and visibility: Broken cloud above 700m during the morning, this mostly lifting to above the summits by late morning but brief ragged scraps of cloud are possible above 800m during any heavier showers. Often very good visibility in between showers with excellent air clarity but temporarily lowering to around 1000 metres during the heavier showers. Locally very poor in any hill fog.

300	11/9	13/11	14/12	14/11	12/9	9/7	9/6
Valley	11/10	14/12	15/13	14/12	12/10	10/8	9/7
Freezing Level*	1900m	1800m	1800m	1800m	1700m	1600m	1500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling rather cold on the summits due to quite a strong southwesterly wind. However, in between the showers UV levels will be high so remember waterproofs and sun protection.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 26 May 2024	5.4mm	5.6mm	5.6mm

Forecast for Monday 27 May 2024

Weather: A similar day to on Sunday but whilst still breezy, somewhat less windy with fewer showers and longer drier spells. Isolated heavy showers are also possible, mainly late morning and early afternoon. Becoming mostly dry later in the day.

Maximum wind: West or southwesterly 20 mph gusting 30 mph.

Chance of cloud-free hill tops 600m: 60% at first, increasing 90% by mid-morning.

Low cloud and visibility: Patches above 800m, generally lifting above all the summits by mid-morning, outside of any showers. Often very good visibility in between showers with excellent air clarity but temporarily lowering to around 1000 metres during the heavier showers. Locally very poor in any hill fog.

Temperature: **Valleys:** Plus 7 Celsius rising to plus 16 Celsius.
At 600m: Plus 6 Celsius rising to plus 10 Celsius.
Freezing level: Well above the summits.
